

BUG-001 — Checkout possible with empty cart

Related test: TC-CART-020

Severity: High

Priority: High

Steps:

1. Log in with a valid user.
2. Ensure the cart is empty.
3. Open the Cart page.
4. Click **Checkout**.
5. Observe the result.

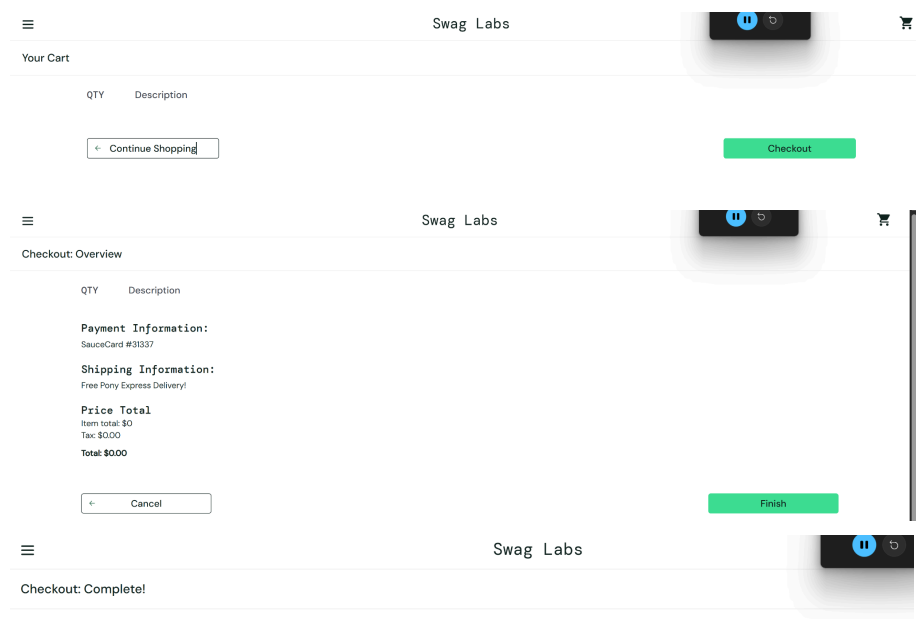

Expected:

The user should not be able to proceed to Checkout when the cart contains no products. An appropriate validation message or disabled Checkout option should be displayed.

Actual:

The application allows the user to proceed to Checkout even when the cart is empty.

This can allow an invalid purchase flow to begin without any product in the order.

BUG-002 — Checkout accepts invalid customer information

Related test: TC-CHK-022

Severity: High
Priority: High

Steps:

- 1. Log in with a valid user.
- 2. Add a product to the cart.
- 3. Proceed to Checkout.
- 4. Enter invalid values in the name fields and postal code field.
- 5. Submit the order.
- 6. Observe the result.

Expected:

The application should reject invalid customer information and display appropriate validation messages. The order should not be submitted.

Actual:

The application allows checkout to be completed using invalid values for the name and postal code fields.

BUG-003 — Incorrect product images displayed for problem user

Related tests: AU-PL-001, AU-PL-002

Severity: Medium

Priority: High

Steps:

- 1. Log in using `problem_user`.
- 2. Navigate to the Products page.
- 3. Review the product images.
- 4. Compare each image with its corresponding product.

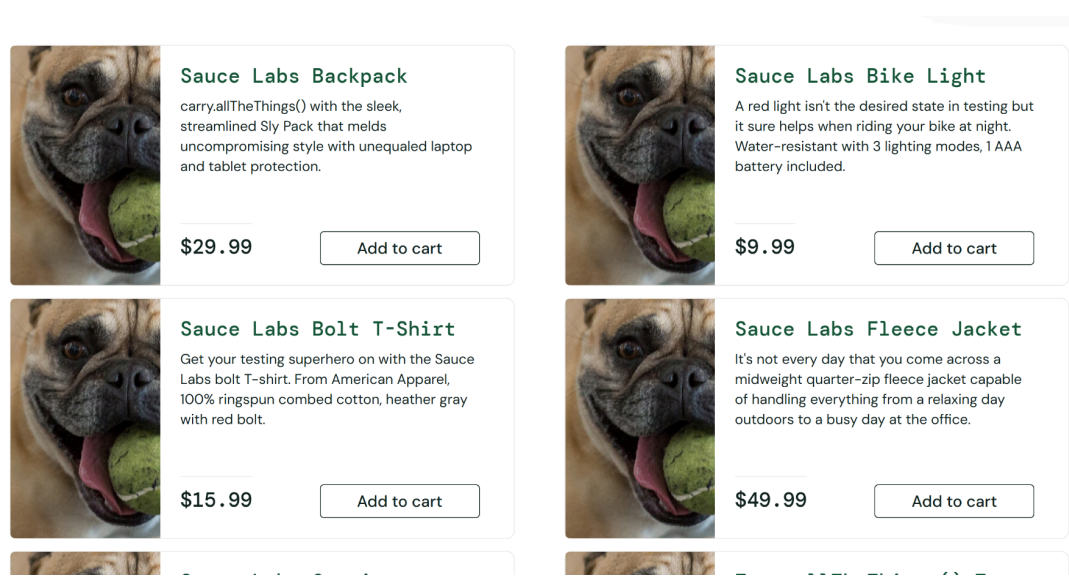

Expected:

Each product should display its corresponding product image.

Actual:

Incorrect product images are displayed for the products.

Status: Open

BUG-004 — Remove button does not work from Product Listing page

Related test: AU-CART-003

Severity: Medium

Priority: Medium

Steps:

1. Log in using `problem_user`.
2. Navigate to the Products page.
3. Add a product to the cart.
4. Attempt to remove the product using the Remove button from the Product Listing page.
5. Observe the result.

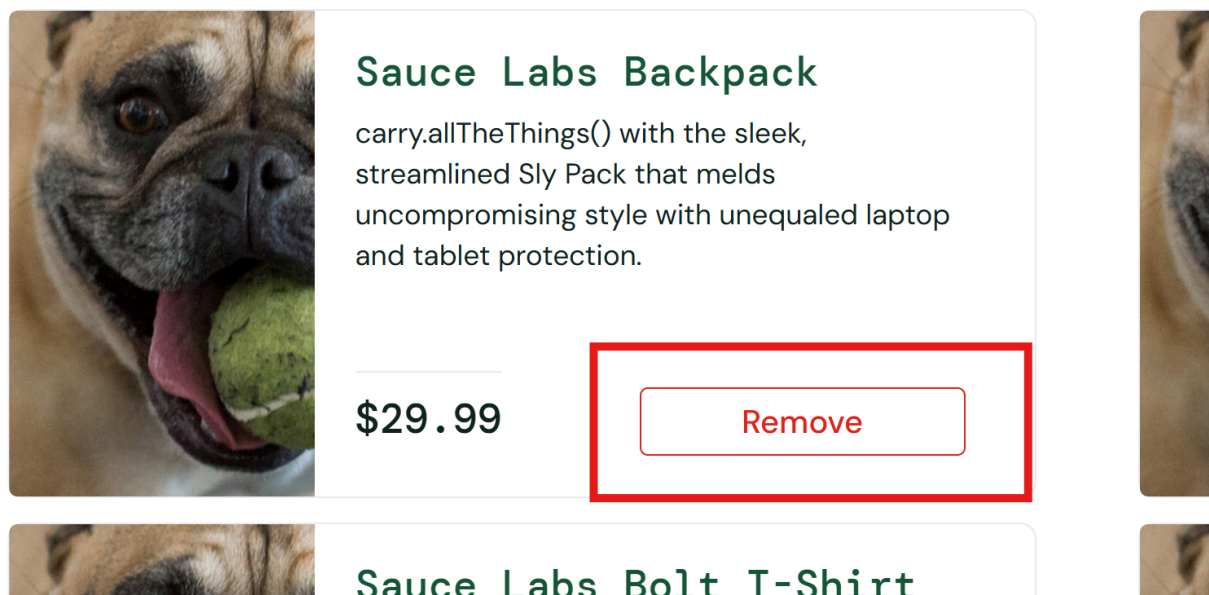

Expected:

The selected product should be removed from the cart when the Remove button is clicked.

Actual:

The Remove button does not remove the product from the cart when used from the Product Listing page. The product can be removed successfully from the Cart page.

Status: Open

BUG-005 — Incorrect product images displayed for visual user

Related test: AU-VIS-001

Severity: Medium

Priority: Medium

Steps:

1. Log in using `visual_user`.
2. Navigate to the Products page.
3. Review the displayed product images.
4. Compare the images with their corresponding products.

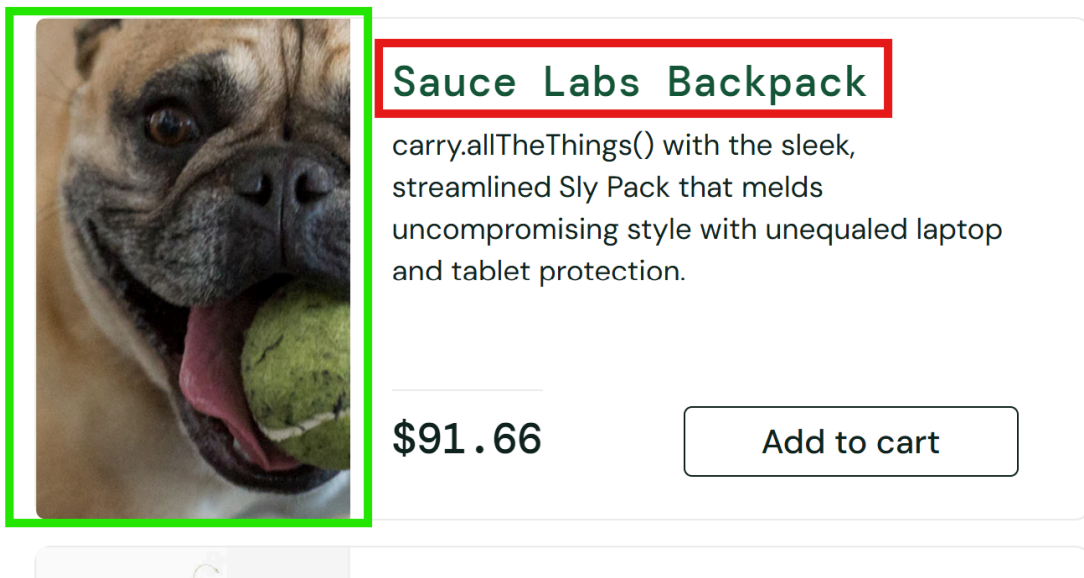

Expected:

Product images should be displayed correctly and correspond to their respective products.

Actual:

Product images are displayed incorrectly.

Status: Open

BUG-006 — Product card layout is visually inconsistent

Related test: AU-VIS-002

Severity: Low/Medium
Priority: Medium

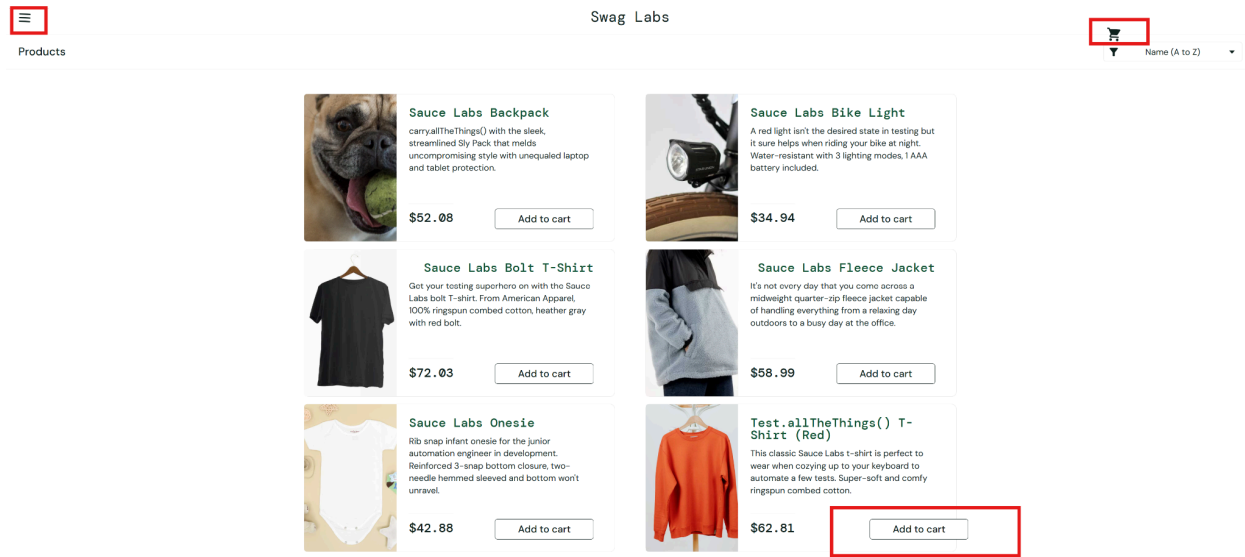

Steps:

- 1. Log in using `visual_user`.
- 2. Navigate to the Products page.
- 3. Review the product cards.
- 4. Check alignment, spacing, product names, prices and buttons.

Expected:
Product cards and their UI elements should be consistently aligned and displayed without visual defects.

Actual:
The product card layout contains visual alignment/layout issues.

Status: Open

BUG-007 — Cart/Checkout UI alignment issue

Related test: AU-VIS-003

Severity: Low

Priority: Medium

Steps:

1. Log in using `visual_user`.
2. Add a product to the cart.
3. Open the Cart page.
4. Review the cart icon and Checkout button alignment.

Expected:

Cart page elements should be properly aligned and displayed consistently.

Actual:

An alignment issue is observed between the Checkout button and cart UI elements.

Status: Open
